

NETWORK DETECTION AND RESPONSE

GREYCORTEX

Security and Reliability of Your IT and OT Networks

UNIQUE VISIBILITY

ACTIVE PROTECTION & PREVENTION

POWERFUL DETECTION

EASY XDR INTEGRATION

Unique Visibility

into your IT and OT
networks

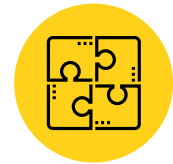

- Visibility of all devices and users in your network
- Visualization of all their communications – up to application level
- Monitoring of BYOD and IoT device behavior
- User identity, device tagging and inventory details
- Performance monitoring of applications, devices and your network
- Traffic recording and decryption
- Support for software-defined networking (SDN)/Cisco ACI
- Everything in the context of time (up to several years back) and events

Powerful Detection

of threats and anomalies
in their early stages

- Cyber-crime, hacker activities, ransomware, undetected malware
- Verification that your firewall, endpoint security or VPN is functioning
- Misconfigurations and changes to your network configuration
- Security policy violations
- Multiple behavioral detection methods, including unsupervised machine learning, statistical analysis and event correlation
- Threat intelligence and IDS signatures
- Encrypted traffic analysis
- Analysis using fully filterable data with multiple viewing options

Easy XDR Integration

thanks to the integration
of EDR, firewalls and more

- Maximum visibility into the entire infrastructure
- Correlation of malicious traffic detections
- Prioritized list of suspicious detections and vulnerable configurations
- Quick uncovering of the root cause of problems
- Minimized incident response time
- Automatic blocking of unwanted communications
- Forwarding of data, alerts and events to the XDR platform, SIEM or SOAR
- Enabling the work efficiency of security surveillance teams

Our Satisfied Customers

GOVERNMENT

"GREYCORTEX Mendel provides me with an irreplaceable and very important input for my decision-making. I know what I have to deal with, when and how."

Infrastructure Manager and Cyber Security Architect – Office of the Chamber of Deputies of the Parliament of the Czech Republic

E-COMMERCE

"If some attacks were successful, we wouldn't know without Mendel."

IT Security Manager – Empik S.A. (Poland)

CRITICAL INFRASTRUCTURE

"We originally installed GREYCORTEX Mendel as a short-term solution following the increased responsibility thrust on us by legislation. But we were really impressed with it and since then, we have been using Mendel for years. It has helped us secure our network and identify risks much more quickly than we expected."

ICT Director – Technical Networks Brno (Czech Republic)

EDUCATION

"GREYCORTEX Mendel helps me find what I need, even if sometimes I don't know exactly what to look for. The perfect visualization helps us to understand the essence and scale of the problem – this is the most important feature of the system. On top of that, the visualization of network communication is understandable, even for the university's management without a technical background."

Cybersecurity Manager – Prague University of Economics and Business (Czech Republic)

BANKING

"We can work with historical data that improves the quality of machine learning, thereby strengthening general network protection and real-time threat detection. This gives our security team unique visibility into the network, even in the context of time – they can see who is accessing where today and what accesses existed in the past."

HEALTHCARE

"We particularly appreciate the independence of the product from the existing infrastructure and the high reliability of the hardware, as well as virtual deployment. In our day-to-day work, we value the email alert settings, their subsequent checking in Mendel and the detailed search options."

Cybersecurity Officer – Bulovka Hospital, the biggest hospital in the Czech Republic

Experience GREYCORTEX Mendel

Proof of Concept (PoC)

Try GREYCORTEX Mendel for yourself. We can even offer a monthly network security audit.
